

What's New in GTM PRO # 4.9.603

Google has modified the free Google Maps API delivery policy and now requires the client to have an alphanumeric key to access maps.

To get the key, Google requires the customer to provide a credit card for any charges. Information can be obtained at:

<https://cloud.google.com/maps-platform/pricing/?hl=en>

In version 4.9.603 the image transfer tool presents a new button "Settings" that when clicked presents a field for the insertion of its key as the image below:
