

The image transfer tool only works on PRO version of GPS TrackMaker 4.9.609:
 For download: <https://www.trackmaker.com/main/en/download-gps-software>
 The user must have a Google Maps Javascript API/Static Maps key so that the text "For Development Purposes Only" does not appear in the images. Contact the Google sales team through the Google Cloud Pataform: <https://cloud.google.com/maps-platform/pricing/?hl=en>.

To fix the Script Error, close the window of the displayed error:

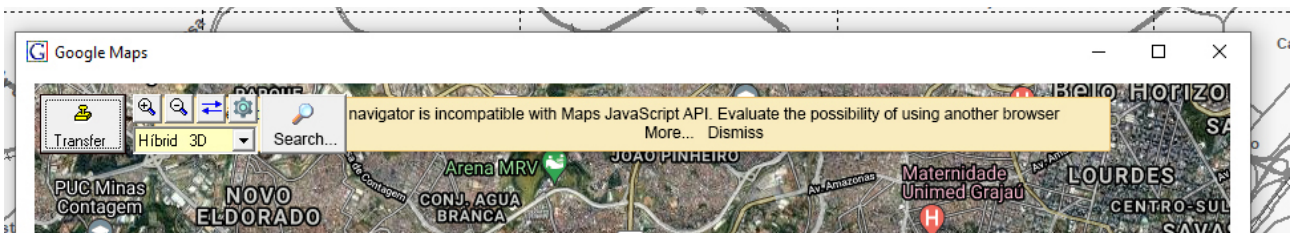

On the image transfer tool screen, click the gear on the left side of the "Search..." button and enter API version 3.47 as shown in the image below. Click OK, close and open the program again:

Yellow text is often displayed on the map screen, click dismiss before transferring the image:

TIP: copy and paste your google key into notepad and save to your computer. You may need to paste the key back into the GTMPRO image transfer tool after the upgrade.
